
Work History

■ Software Engineer

Horse Racing Labs LLC, Louisville, KY | August 2017 - Current

- Coordinated with other engineers to evaluate and improve website and database solutions.
- Developed robust Cloudformation stacks to run our Dockerized infrastructures.
- Coordinated deployments of new software, feature updates and fixes.

■ Full Stack Developer

Humana, Louisville, KY | September 2016 - August 2017

- Reviewed code, debugged problems, and corrected issues.
- Helped convert majority of codebase to ES6
- Worked with back-end developers to design APIs.
- Utilized paired-programming with internal and off-shore developers to deliver test-driven solutions.

■ Web Developer

Media Marketers, Louisville, KY | September 2014 - September 2016

- Coded websites using PHP, HTML, CSS, and JavaScript.
- Provided front-end website development using WordPress.
- Discussed site and app requirements with clients to produce actionable development plans.
- Oversaw technical issues and troubleshooting requests to resolve user problems.

Education

Incomplete Degree in Computer Science '09-'11
The University of The South, Sewanee, TN
